

3-1/2" Carbide Tipped Hole Cutter

Part Number CT56  
Category Number 6405  
UPC 781002855552

Carbide Tipped Hole Cutters are used to cut holes in mild steel, stainless steel, iron, copper and brass sheet metal. They are manufactured with a built-in drill flange to prevent penetration beyond the sheet metal for safe and precise cutting. A replaceable pilot bit that helps to guide the cutter into the material to provide easier drilling and hole making.

Physical Characteristics

Type	Hole Cutter
Shank Type	Hex
Shank Size (in)	3/8"
Hole Saw Size (in)	3-1/2"
Material	Carbide Tipped

Packaging Details

Standard Qty	1
Master Qty	4
Price Per	1
Package Length	4.30
Package Width	4.30
Package Height	4.80
Package Weight	1.50
Net Weight	1.5

Performance Data

Maximum Cutting Depth	3/16" Sheet Metal, 1/8" Stainless Steel
Applications	Mild Steel, Stainless Steel, Iron, Copper, Brass Sheet Metal
Special Features	Replaceable Pilot Bit

Certifications

IGCC	2437
RoHS Compliant	Yes
