

# Product Specifications

## 3" x 1000' Red Detectable Tape (Caution Buried High Voltage Line Below)

Part Number DU09  
Category Number 5325  
UPC 781002163664

Detectable Tape is used for locating and protecting buried utility, communication, CATV, fiber optic, sewer, water, and gas lines along with cables and conduits. It is a 4.5 mil, foil bonded polyethylene tape manufactured with a solid aluminum foil core and a continuous warning. In order to properly locate, an industrial grade, non-ferrous metal detector should be used. Meets APWA color codes.

### Physical Characteristics

Type	Detectable Warning Tape
Size	3" x 1000'
Length (ft)	1000'
Width (in)	3"
Thickness (mil)	4.5 mil
Material	Foil Bonded Polyethylene
Color	Red

### Packaging Details

Standard Qty	1
Master Qty	12
Price Per	1
Package Length	9.30
Package Width	8.70
Package Height	2.90
Package Weight	6.25

### Performance Data

Tensile Strength	Width Direction: 55.9 N/10mm, Length Direction: 40.1 N/10mm
Elongation	Width Direction: 15%, Length D
Applications	Provides Detection, Location, and Identification of Buried Utility Lines, Pipes, Cables & Conduits
Resists	Acids, Alkalies, Other Destructive Elements in Soil
For Use With	Non-Ferrous Metal Detector
Tape Features	Non-Adhesive
Special Features	Continuous Warning, Highly Visible, Encased Message to Prevent Ink Rub-Off

### Certifications

IGCC	5314
RoHS Compliant	No
