

# Product Specifications

## 5/8" x 4" Bi-Metal Reciprobeblade

Part Number R414B  
Category Number 6450  
UPC 781002313007

The R414B has a flexible spring steel back and is laser welded to a hardened edge for use in metal cutting applications. It is suitable for use on heavy gauge metals that are 1/8" thick and above.

### Physical Characteristics

|                 |                         |
|-----------------|-------------------------|
| Type            | Reciprocating Saw Blade |
| Teeth Type      | Raker                   |
| Arbor Size (in) | 1/2" Universal          |
| Size            | 3/4" x 4"               |
| Length (in)     | 4"                      |
| Width (in)      | 3/4"                    |
| Thickness (in)  | 0.035"                  |
| Material        | Bi-Metal Cobalt         |
| Finish          | Powder Coated           |
| Color           | White                   |
| Teeth Per Inch  | 14                      |

### Packaging Details

|                |      |
|----------------|------|
| Standard Qty   | 5    |
| Price Per      | 1    |
| Package Length | 6.22 |
| Package Width  | 1.57 |
| Package Height | .08  |
| Package Weight | .15  |
| Net Weight     | 0.03 |

### Performance Data

|                   |  |
|-------------------|--|
| Rockwell Hardness | 64 - 66 HRC                                    |
| Applications      | Heavy Gauge Metal, 1/8 in. Thickness and Above |
| Special Features  | Vacuum Heat Treated, Tooth Hardness 66-68 HRC  |

### Certifications

|                |      |
|----------------|------|
| IGCC           | 2399 |
| RoHS Compliant | Yes  |
