

1/4" x 2" Zamac Alloy Anchor w/ Removable Screw

Part Number ZAS200
Category Number 4495
UPC 781002593645

Zamac Anchors with Removable Screw are suitable for use in concrete, block, brick or stone. They are a unique, one-step nail drive anchor that features a Phillips style head. The body of the anchor is formed from corrosion resistant Zamac alloy and a zinc plated carbon steel drive screw. When compared to a traditional Zamac Anchor, the ZAS has been designed to provide a removable anchor with higher tension loads when installed in concrete. These anchors are not recommended for use overhead or applications where holding values are critical.

Physical Characteristics

Bit	IB2PC
Anchor Type	Zamac Anchor
Drive Type	Phillips
Head Type	Flat
Anchor Diameter	1/4"
Anchor Length	2"
Material	Zamac Alloy
Screw Material	Carbon Steel
Finish	Zinc Plated

Packaging Details

Standard Qty	100
Master Qty	500
Price Per	100
Package Length	6.10
Package Width	4.80
Package Height	3.00
Net Weight	0.0314
Package Weight	3.14

Performance Data

Pre-Drill Size	1/4"
Applications	Concrete, Block, Brick, Stone, Light Duty Work, Not Reccomended for Ceiling Applications
Special Features	Carbon Steel Screw, Corrosion Resistant Zamac Alloy, Removable Screw

Certifications

RoHS Compliant	No
